AUTHOR INDEX

ABLETT, R. F., see Budu-Amoako, 46
ACCERBI, M., Extrusion processing of DON-contaminated wheat, 1485
ACKERS, M.-L., see Shapiro, 118
ACUFF, G. R., see Castillo, 146, 580
ADAMS, A. M., Survival of *A. simplex* in microwaved fish, 403
ADAMS, A. M., see Jinneman, 682
AHVENAINEN, R., see Hurme, 363
ALAVI, S. H., Dynamic growth model for *Listeria monocytogenes*, 170
AL-DAGAL, M. M., Preservation of whole and peeled shrimp, 51
ALMEIDA, R. A., see Oliver, 1354
ALZAMORA, S. M., see López-Malo, 1215
AMAGUAÑA, R. M., see Hammack, 16
ANAND, S. K., see Kushal, 1203
ANDERSON, K. L., see Baynes, 177
ANDOLFI, R., see Mauriello, 773
ANDREWS, W. H., see Hammack, 16
ANGELIDIS, A. S., Evaluation of Delvo-X-Press, 1183
ANGELINO, P. D., Comparison of ALP determination methods, 81
ANSAY, S. E., Survival of *E. coli* O157:H7 and ground beef, 1243
APELLA, M. C., see Audisio, 751
APONTE, M., see Mauriello, 773
ARGAIZ, A., see Matamoros-León, 540
ARIÑO, A. A., see Lazaro, 1054
ARIYAPITIPUN, T., Lactic acids and nisin effects on beef shelf life, 913
ASENSIO, L., see Céspedes, 1178
ASHRAF, H.-R., Safety of tofu, 1050
AUDISIO, M. C., Antagonistic effect of *E. faecium* J96 against *Salmonella* spp., 751
AURELI, P., see Franciosa, 867
AUSTIN, J. W., see Daifas, 349, 1157

BABA, E., see Fukata, 229
BACON, C. W., see Yates, 1326
BAILEY, J. S., see Berrang, 73; Fedorka-Cray, 1376
BAILLY, J. D., Fluorodensitometric analysis of ergosterol, 686
BAKER, L. P., see Gill, 637
BARI, M. L., Inhibition of *Escherichia coli* O157:H7 in fresh radish sprouts, 128
BARON, F., *Salmonella* Enteritidis in egg white powder, 585
BARON, F., see Jeantet, 1381
BARRIAULT, C., see Kerkadi, 1461
BARROS-VELAZQUEZ, J., see Ben-Gigirey, 933
BARTLETT, F. M., see Knight, 999
BAYARRI, S., see Lazaro, 1054
BAYNES, R. E., Antibiotic residues and bacteria in milk, 177
BAZARAA, W. A., see Al-Dagal, 51
BEARD, B. M., Thermal resistance of spores supplemented with nisin, 484
BEATTIE, S., see Angelino, 81
BELK, K. E., see Ware, 1255
BELLINGER, G. R., see Sofos, 140
BELLON-FONTAINE, M.-N., see Briandet, 994
BENARD, G., see Bailly, 686
BEN-GIGIREY, B., Amine production by bacteria from albacore, 933
BERAQUET, N. J., see Silveira, 1333
BERNARDO, A., see Mazas, 410
BERRANG, M. E., *Salmonella* penetration of eggshell membrane, 73
BERRY, B. W., see Sair, 156
BERSANI, C., see Marino, 1017
BEUCHAT, L. R., *E. coli* O157:H7 on lettuce, 845
BEUCHAT, L. R., see Hao, 499; Mahakarnchanakul, 57; Ryu, 451; Taormina, 850
BEUMER, R. R., see Heuvelink, 1115
BEVIS, H. E., see Davies, 1004
BLAIS, B. W., Swab-based detection system, 386
BLAKISTONE, B., Effect of peroxyacetic acid Oxonia Active on spore formers, 262
BLANCHFIELD, B., see Daifas, 349, 1157
BOLTON, D., see Yu, 1478
BOLTON, L. F., L. monocytogenes in cheese, 601
BOOREN, A. M., see Sair, 156
BOTANA, L. M., see Vieites, 515
BOYAVAL, P., see Duffes, 1394
BOYD, G., see Buchanan, 219; Thayer, 1136
BRACKETT, R. E., see Hao, 26, 499; Michalski, 112; Seo, 431
BRADLEY, R. L., JR., see Gruetzmacher, 625
BRAGULAT, M. R., see Castellá, 811
BRASHEARS, M. M., Antagonistic action of *L. lactis* toward foodborne pathogens, 1336
BRENNAN, R. E., see López-González, 10; Murano, 480
BRIANDET, R., *Listeria* cell growth and adhesion, 994
BROWN, C. A., see Harmon, 574
BROWN, R. L., see Guo, 295
BROWNIE, C. F., see Baynes, 177
BRÖZEL, V. S., see Manie, 615
BRULÉ, G., see Baron, 585; Jeantet, 1381
BUCHANAN, R. L., *E. coli* acid resistance, 211; Acid resistance and radiation resistance, 219; *E. coli* O157:H7 on apples, 444
BUDU-AMOAKO, E., Effect of nisin and moderate heat on *Listeria*, 46
BUEGE, D. R., see Calicioglu, 944; Sofos, 140

BUHR, R. J., see Berrang, 73
BULLERMAN, L. B., see Ryu, 1451, 1456, 1482; Wolf-Hall, 962
BÜLTE, M., see Lücker, 268

SUBJECT INDEX

Acid habituation
E. coli acid resistance, 211
Acid shock response
L. monocytogenes survival in acidified skim milk, 670
Acid tolerance
Acid-adapted *E. coli* O157:H7, 451
Acid resistance and radiation resistance, 219
Acid tolerance response
Acid-adapted *Listeria* tolerant to bacteriocins, 536
L. monocytogenes survival in acidified skim milk, 670
Acrobacter
Comparison of *Acrobacter* isolation protocols, 610
Adaptation
Acid-adapted *Listeria* tolerant to bacteriocins, 536
Adhesion
Listeria cell growth and adhesion, 994
Aerobic plate count(s)
Bacterial contamination in fresh vegetable factories, 800
Bacterial contamination of vegetables, 644
Quality of packaged ice in Florida, 526
Steam vacuuming for beef decontamination, 146
Aeromonads
Aeromonads in Spanish sausages, 1045
Aeromonas
Characterization of *Aeromonas* spp. from channel catfish, 30
Aeromonas caviae
A. hydrophila, A. caviae, and *A. sobria* in milk products in Greece, 463
Aeromonas hydrophila
Aeromonads in Spanish sausages, 1045
A. hydrophila, A. caviae, and *A. sobria* in milk products in Greece, 463
Aeromonas sobria
A. hydrophila, A. caviae, and *A. sobria* in milk products in Greece, 463
Aeromonas spp.
Fresh-cut produce under equilibrium-modified atmosphere, 1128
Aerotolerant *Camphlobacter*
Isolation medium for *Arcobacter,* 456
Aflatoxin
Aflatoxin reduction in corn, 650
Coproduction of cyclopiazonic acid and aflatoxins, 292
Inhibition of fungi by Welsh onion, 414
Albacore
Amine production by bacteria from albacore, 933
Alfalfa
E. coli O157:H7 on alfalfa seeds, 850
Alfalfa seeds
E. coli O157:H7 on alfalfa seeds, 318
Alfalfa sprouts
Salmonella in alfalfa seeds, 662
Alicyclobacillus
Alicyclobacillus in orange juice, 883
Alkaline phosphatase
Comparison of ALP determination methods, 81
Alternaria sp.
PCR assay for *Alternaria,* 1191
Anchovies
Halotolerant histamine-forming bacteria in salted anchovies, 509
Anisakis simplex
Survival of *A. simplex* in microwaved fish, 403
Antagonists
Biological control of *E. coli* in apples, 1372
Antibacterial activity
Antibacterial activity of chitosan, 239
Antibacterial mechanism
Antibacterial activity of chitosan, 239
Antibiotic resistance
Resistance of bacteria on bovine products, 615
Antibiotics
Antibiotic residues and bacteria in milk, 177
Antifungal activity
Inhibition of fungi by Welsh onion, 414
Antimicrobial
Preservation of whole and peeled shrimp, 51
Antimicrobial activity
Antimicrobial activity of *T. vulgaris* oils, 1017
Antimicrobial resistance
Stress and antimicrobial resistance, 797
Antioxidant(s)
Antimicrobial and antioxidant compounds in orange essential oil, 929
Sanitation of ground beef products by ionizing radiation, 619
Antioxidant activity
Optimization of antioxidants from *A. candidus,* 657
Apple cider
E. coli in apple cider, 567
E. coli O157:H7 on apples, 444
Indicator bacteria in apple cider, 887
Apple juice
E. coli O157:H7 on apples, 444
GC-MS analysis of underivatized patulin, 202
Inactivation of *E. coli* O157:H7 by pulsed electric fields, 793
Aquacultured fish
Bacterial microflora of trout and pike, 1270
Arcobacter
Isolation medium for *Arcobacter,* 456
Aspergillus candidus
Optimization of antioxidants from *A. candidus,* 657
Aspergillus flavus
Aflatoxin reduction in corn, 650
Coproduction of cyclopiazonic acid and aflatoxins, 292
Inhibition of fungi by Welsh onion, 414
Aspergillus parasiticus
Aflatoxin reduction in corn, 650
Inhibition of fungi by Welsh onion, 414
Assay
Limitations of molecular biological techniques for foods, 691
ATP bioluminescence
Effect of cleaners and sanitizers on ATP bioluminescence, 86

Attachment
E. coli on lettuce, 3
Avian
Risk associated with avian *E. coli*, 741

Bacillus cereus
Bacterial contamination in fresh vegetable factories, 800
Heat resistance of *B. cereus* in milk products, 410
Microbiological quality of cooked rice, 877
Nisin sensitizes spores to heat, 492
Bacillus cereus strains
Effect of temperature shift on *B. cereus*, 57
Bacillus licheniformis
Thermal resistance of spores supplemented with nisin, 484
Bacillus spp.
Microbiological quality of cooked rice, 877
Bacillus stearothermophilus
Nisin sensitizes spores to heat, 492
Nonisothermic heating of *Bacillus stearothermophilus*, 958
Thermal resistance of spores supplemented with nisin, 484
Bacteria
Antibiotic residues and bacteria in milk, 177
Carcass sampling by sponging and excising, 1255
Halotolerant histamine-forming bacteria in salted anchovies, 509
Resistance of bacteria on bovine products, 615
Bacterial contamination
Inadequately cleaned equipment, 637
Bacterial microflora
Bacterial microflora of trout and pike, 1270
Bacteriocin
Antagonistic effect of *E. faecium* J96 against *Salmonella* spp., 751
Bacteriocin-producing bacteria from garlic and ginger root, 899
L. monocytogenes growth controlled by bacteriocin on salmon, 1394
Spray-drying of bacteriocin-producing lactic acid bacteria, 773
Bakery products
C. botulinum in MAP crumpets, 349
Effect of pH and CO_2 on *C. botulinum*, 1157
Beef
Beef carcass contamination, 140
Beef carcass contamination with *E. coli*, 234
Brain or spinal cord in meat, 394
Carcass sampling by sponging and excising, 1255
Decontamination of beef with saponin, 280
Ecological effect of *T. saginata* in beef imported into Norway, 1320
Lactic acids and nisin effects on beef shelf life, 913
Microbiology of tails and head meats, 674
Nisin or nisin and EDTA inhibition of *L. monocytogenes* and *E. coli* O157:H7, 1123
Pathogen reduction by acidified sodium chlorite, 580
Recovery of E. coli and enterococci from beef carcasses, 944
Resistance of bacteria on bovine products, 615
Salmonella in beef, 467
Steam vacuuming for beef decontamination, 146
Triclosan-incorporated plastic on beef, 474
T. saginata infections in beef, 1314
Beef patty
Sanitation of ground beef products by ionizing radiation, 619
Bifidobacteria
Bile resistance and bile precipitation, 905
Cytokine expression in yogurt-fed mice, 181
Preservation of whole and peeled shrimp, 51
Storage stability of fermented soymilks, 808
Bifidobacterium spp.
Enumerating *L. acidophilus* and *Bifidobacterium* spp., 77
Bile
Bile resistance and bile precipitation, 905
Bile salts depletion
Cholestyramine and ochratoxin A toxicity, 1461
Biocontrol
FB_1 production suppressed by *T. viride*, 1326
Biofilms
Inactivation of biofilms, 761
Biogenic amines
Amine production by bacteria from albacore, 933
Biogenic amines in aerobically stored gilt-head sea bream, 398
Biogenic amines in bluefish, 1033
Biological control
Aflatoxin reduction in corn, 650
Biopreservation
Growth control of *L. monocytogenes*, 336
Spray-drying of bacteriocin-producing lactic acid bacteria, 773
Biosensor
Rapid detection of *E. coli* O157:H7 by a biosensor, 711
Rapid response biosensor to detect *Salmonella* Typhimurium, 431
Biotype I
Recovery of *E. coli* and enterococci from beef carcasses, 944
Botulism
Botulism risk from packaged cut melons, 948
Bovine
E. coli O157:H7 on lettuce, 845
Bovine mastitis
Phenolic combination as a postmilking teat disinfectant, 1354
Bovine milk
Thermal inactivation of pathogens in milk, 861
Bovine spongiform encephalopathy
Detection of CNS in meat products, 268
Bread
Microbiota of Portuguese sourdough, 1416
Breaking process
Inadequately cleaned equipment, 637

Broth filtrate
Optimization of antioxidants from *A. candidus,* 657

Cadaverine
Amine production by bacteria from albacore, 933
Biogenic amines in bluefish, 1033
Calcinated calcium
Inhibition of *Escherichia coli* O157:H7 in fresh radish sprouts, 128
Calves
E. coli O157:H7 in fasted calves, 574
Campylobacter coli
Salmonella, C. jejuni, C. coli, and *L. monocytogenes* in poultry, 735
Campylobacter jejuni
Salmonella, C. jejuni, C. coli, and *L. monocytogenes* in poultry, 735
Canning
Canning process for contaminated mussels, 515
Extrusion and autoclaving of deoxynivalenol, 962
Capillary tubes
Elimination of *Salmonella* Enteritidis from liquid egg products, 112
Carbon dioxide (CO_2)
Clostridium botulinum in CO_2-treated milk, 872
Effect of pH and CO_2 on *C. botulinum,* 1157
Carbon source
Optimization of antioxidants from *A. candidus,* 657
Carcass
Beef carcass contamination, 140
Beef carcass contamination with *E. coli,* 234
Carcass sampling by sponging and excising, 1255
Microbiological contamination of reindeer carcass, 152
Microbiological status of sheep meat in Australia, 380
Salmonella in beef, 467
Caribbean
Antibiotic residues and bacteria in milk, 177
Carnobacterium
L. monocytogenes growth controlled by bacteriocin on salmon, 1394
Carnobacterium piscicola
Growth control of *L. monocytogenes,* 336
Catalase
Iron and selenium effects on *L. monocytogenes,* 1206
Catfish
Characterization of *Aeromonas* spp. from channel catfish, 30
Cattle
Cattle stunning CNS tissue, 390
Cleanliness of cattle at slaughter, 520
Fecal shedding of *E. coli* O157 on dairy farms, 307
Cell culture
Limitations of molecular biological techniques for foods, 691
Cell-induced immunity
Foodborne infections during pregnancy, 818
Cell surface hydrophobicity
Intestinal lactobacilli from chickens as potential probiotics, 252
Cell wall
Cytokine and no induction in macrophages, 1435
Centralized meat packaging
Centralized meat packaging, 418
Central nervous tissue
Detection of CNS in meat products, 268
Characterization
Risk associated with avian *E. coli,* 741
Cheese
L. monocytogenes in cheese, 601
Cheesecake
Salmonella in cheesecake, 26
Chemical
Quality of packaged ice in Florida, 526
Chemical sanitizers
Effect of cleaners and sanitizers on ATP bioluminescence, 86
Chemiluminescence
Enzymatic detection of tetracyclines in milk, 632
Chicken
Growth models for *Salmonella* Typhimurium, 1111
Predictive models for growth kinetics of *Salmonella,* 1470
Preservation techniques for thiamin in chicken, 1303
Chicken intestinal flora
Intestinal lactobacilli from chickens as potential probiotics, 252
Chicks
Inhibition of *Salmonella* colonization, 229
Chlorhexidine gluconate
Responses of food spoilage bacteria to sanitizer treatments, 368
Chlorinated water
E. coli O157:H7 on lettuce, 845
Chlorine
E. coli on lettuce, 3
Chlorophyll derivatives
Pigment composition in green-stained olives, 1167
Cholesterol
Detection of CNS in meat products, 268
Cholestyramine
Cholestyramine and ochratoxin A toxicity, 1461
Chorizo
Aeromonads in Spanish sausages, 1045
Chromogenic
L. monocytogenes detection system, 244
Cider
Use of HACCP in apple cider production, 778
Citrus
Sanitizing fruit for juice safety, 756
Clostridia
Impedance in food hygene, 1488
Clostridium
Psychotrophic clostridia in meat, 766
Clostridium botulinum
Botulism risk from packaged cut melons, 948
C. botulinum in MAP crumpets, 349
Clostridium botulinum in CO_2-treated milk, 872
Effect of pH and CO_2 on *C. botulinum,* 1157

Microbiology of packaged produce, 499
Clostridium botulinum spores
C. botulinum in milk products, 867
Clostridium perfringens
Enumeration of *C. perfringens,* 1041
CMD medium
Enumeration of *E. coli* from animal-derived foods using conductance, 1260
Coins
Fate of pathogens on currency, 805
Cold pasteurization
Pulsed electric field processing of foods, 1088
Cold smoked salmon
Growth control of *L. monocytogenes,* 336
L. monocytogenes growth controlled by bacteriocin on salmon, 1394
Coliform count
Quality of packaged ice in Florida, 526
Coliform group
Bacterial contamination in fresh vegetable factories, 800
Coliforms
Bacterial contamination of vegetables, 644
Indicator bacteria in apple cider, 887
Steam vacuuming for beef decontamination, 146
Color
Cooking adequacy of beef patties, 156
Color stability
Endowment of cured color in meat by ionizing radiation, 1162
Combined effect
The combined effect of nisin and propionic acid on mold growth, 1223
Competition
Aflatoxin reduction in corn, 650
Growth control of *L. monocytogenes,* 336
Competitive exclusion
Inhibition of *Salmonella* colonization, 229
Mucosal competitive exclusion to reduce *Salmonella* in swine, 1376
Compound feeds
Fluorodensitometric analysis of ergosterol, 686
Conductance
Enumeration of *E. coli* from animal-derived foods using conductance, 1260
Confirmation
GC-MS analysis of underivatized patulin, 202
Confocal microscopy
Salmonella penetration of eggshell membrane, 73
Connecticut
E. coli in apple cider, 567
Contamination
Beef carcass contamination, 140
Cattle stunning CNS tissue, 390
Microbiological contamination of reindeer carcass, 152
Microbiological quality of cooked rice, 877
Microbiological quality of lettuce, 325
Contamination risk
Biological control of *E. coli* in apples, 1372
Cooked rice
Microbiological quality of cooked rice, 877
Cooking
Preservation techniques for thiamin in chicken, 1303
Copper chlorophyll complexes
Pigment composition in green-stained olives, 1167
Copper chlorophyllic complexes
Oxidized chlorophylls and copper complexes in table olives, 1172
Corn
Aflatoxin reduction in corn, 650
FB_1 production suppressed by *T. viride,* 1326
Fumonisins in tortillas and nixtamalized corn from Guatemala, 1218
Cross-contamination
Australian food safety telephone survey, 921
Cross-protection
Acid resistance and radiation resistance, 219
Crumpets
C. botulinum in MAP crumpets, 349
Cryptosporidium
Foodborne and waterborne enteric protozoa, 1059
Cuisine type
Microbiological quality of cooked rice, 877
Currency
Fate of pathogens on currency, 805
Cutting board
Inactivation of foodborne pathogens on cutting boards, 857
Cycling temperatures
Effects of cycling temperature on FB_1 production, 1456
Temperature effects on DON and ZEN production, 1451
Cyclopiazonic acid
Coproduction of cyclopiazonic acid and aflatoxins, 292
Cyclopiazonic acid in Taleggio cheese, 1198
Cyclospora
Differentiation of *Cyclospora* and *Eimeria* spp. by OLA, 682
Foodborne and waterborne enteric protozoa, 1059
Cytokine(s)
Cytokine expression in yogurt-fed mice, 181
Lactic acid bacteria and immunity, 287

D_{10}
The irradiation parameter D_{10} under various conditions, 1024
Dairy
Fecal shedding of *E. coli* O157 on dairy farms, 307
Dairy products
Differential medium for *Kluyveromyces,* 189
PCR-based detection of *S. aureus,* 1150
Debris
Quality of packaged ice in Florida, 526
Decontamination
Decontamination of beef with saponin, 280
Extrusion processing of DON-contaminated wheat, 1485
Pathogen reduction by acidified sodium chlorite, 580
Steam vacuuming for beef decontamination, 146

Delvo-X-Press
Evaluation of Delvo-X-Press, 1183
Denaturation
Salmonella Enteritidis inactivation in egg white by pulsed electric fields, 1381
Deoxynivalenol
Extrusion and autoclaving of deoxynivalenol, 962
Extrusion processing of DON-contaminated wheat, 1485
Temperature effects on DON and ZEN production, 1451
Detection
Detection of *L. monocytogenes* by quantitative PCR, 35
Diacetyl
Antimicrobial activity of diacetyl, 975
Diarrheal illness
Salmonella Thompson in Sioux Falls, 118
Diet
E. coli O157:H7 in fasted calves, 574
Differential medium
Differential medium for *Kluyveromyces,* 189
Differentiation
Differentiation between *E. coli* and *E. coli* O157:H7, 313
Digestion
Trichinella assay for pork and horse meat, 1308
Digoxigenin-labeled nonradioactive DNA probes
Digoxigenin-labeled PCR amplicon probes, 438
Disinfection
Disinfection of mung bean seed, 953
DNA probes
E. coli and retail ground beef, 133
DON
Extrusion and autoclaving of deoxynivalenol, 962
Dynamic growth model
Dynamic growth model for *Listeria monocytogenes,* 170
Dynamic models
E. coli O157:H7 on alfalfa seeds, 318
Ecological effect of *T. saginata* in beef imported into Norway, 1320

Ecology
Ecological effect of *T. saginata* in beef imported into Norway, 1320
EDTA
Nisin or nisin and EDTA inhibition of *L. monocytogenes* and *E. coli* O157:H7, 1123
Education
Domestic food handling video study, 1285
Eggshell membrane
Salmonella penetration of eggshell membrane, 73
Egg white
Salmonella Enteritidis inactivation in egg white by pulsed electric fields, 1381
Egg white powder
Salmonella Enteritidis in egg white powder, 585
Elastase activity
Hemolytic and elastolytic activities in *Plesiomonas shigelloides,* 1475
Electrolyzed oxidizing water
Inactivation of foodborne pathogens on cutting boards, 857
Electron beam
Irradiation of *E. coli* O157:H7 by gamma versus electrons, 10
ELISA
Brain or spinal cord in meat, 394
E. coli O157:H7 in Brazilian hamburgers, 1333
Indirect ELISA for flatfish species identification, 1178
Emesis
Emesis in *S. murinus* induced by staphylococcal enterotoxin A, 1350
Endpoint temperature
Cooking adequacy of beef patties, 156
Enteric bacteria
Stress and antimicrobial resistance, 797
Enteric protozoa
Foodborne and waterborne enteric protozoa, 1059
Enteric virus
Limitations of molecular biological techniques for foods, 691
Enterobacteriaceae
Impedance in food hygene, 1488
Steam vacuuming for beef decontamination, 146
Enterococci
Indicator bacteria in apple cider, 887
Recovery of *E. coli* and enterococci from beef carcasses, 944
Enterococcus faecium
Antagonistic effect of *E. faecium* J96 against *Salmonella* spp., 751
Enterohemorrhagic
Growth and survival of *E. coli,* 1466
Enumeration
Differentiation between *E. coli* and *E. coli* O157:H7, 313
Enumerating *L. acidophilus* and *Bifidobacterium* spp., 77
Environments of food factories
Bacterial contamination in fresh vegetable factories, 800
Enzyme immunoassay
Salmonella in alfalfa seeds, 662
Swab-based detection system, 386
EOH medium
Differentiation between *E. coli* and *E. coli* O157:H7, 313
Equilibrium-modified atmosphere
Fresh-cut produce under equilibrium-modified atmosphere, 1128
Equipment
Inadequately cleaned equipment, 637
Ergosterol
Fluorodensitometric analysis of ergosterol, 686
Escherichia coli
Acid-adapted *E. coli* O157:H7, 451
Antibacterial activity of chitosan, 239
Beef carcass contamination with *E. coli,* 234
Differentiation between *E. coli* and *E. coli* O157:H7, 313
Digoxigenin-labeled PCR amplicon probes, 438
E. coli in apple cider, 567
Enumeration of *E. coli* from animal-derived foods using conductance, 1260
Growth and survival of *E. coli,* 1466
High-pressure inactivation of *E. coli* in milk, 1248

Microbiological quality of cooked rice, 877
Microbiology of tails and head meats, 674
Recovery of *E. coli* and enterococci from beef carcasses, 944
Risk associated with avian *E. coli,* 741
Sanitizing fruit for juice safety, 756
Steam vacuuming for beef decontamination, 146
Use of HACCP in apple cider production, 778
Escherichia coli O157
Fecal shedding of *E. coli* O157 on dairy farms, 307
Verocytotoxin-producing *E. coli* O157 in meats, 1115
Escherichia coli O157:H7
Acid resistance and radiation resistance, 219
Antagonistic action of *L. lactis* toward foodborne pathogens, 1336
Antibacterial effect of lactorerricin B, 747
Antimicrobial activity of diacetyl, 975
Decontamination of beef with saponin, 280
Differentiation between *E. coli* and *E. coli* O157:H7, 313
E. coli acid resistance, 211
E. coli and retail ground beef, 133
E. coli on lettuce, 3
E. coli O157:H7 in Brazilian hamburgers, 1333
E. coli O157:H7 in fasted calves, 574
E. coli O157:H7 on alfalfa seeds, 850
E. coli O157:H7 on lettuce, 845
E. coli O157:H7 stored in orange juice, 1038
Fate of pathogens on currency, 805
Inactivating *E. coli* in orange juice, 277
Inactivation of *E. coli* O157:H7 by pulsed electric fields, 793
Inactivation of foodborne pathogens on cutting boards, 857
Inhibition of *Escherichia coli* O157:H7 in fresh radish sprouts, 128
Irradiation of *E. coli* O157:H7 by gamma versus electrons, 10
Microbiological quality of lettuce, 325
Nisin or nisin and EDTA inhibition of *L. monocytogenes* and *E. coli* O157:H7, 1123
Pathogen reduction by acidified sodium chlorite, 580
Rapid detection of *E. coli* O157:H7 by a biosensor, 711
Recovery and survival of *E. coli* O157:H7 in reconditioned water, 731
Reuterin as a meat decontaminant, 257
rRNA persistence in contaminated milk, 839
Survival of *E. coli* O157:H7 and ground beef, 1243
Triclosan-incorporated plastic on beef, 474
Essential oils
Antimicrobial activity of *T. vulgaris* oils, 1017
Ewe's milk
Proteinases from ewe's milk *Pseudomonas,* 543
Extraction
Limitations of molecular biological techniques for foods, 691
Extracts
Inhibition of fungi by Welsh onion, 414
Extrusion
Extrusion and autoclaving of deoxynivalenol, 962
Extrusion processing of DON-contaminated wheat, 1485
Extrusion cooking
Zearalenone stability in extruded corn grits, 1482

Fecal contamination
Recovery of *E. coli* and enterococci from beef carcasses, 944
Feces
Cleanliness of cattle at slaughter, 520
E. coli O157:H7 on lettuce, 845
Fermented sausage
Aeromonads in Spanish sausages, 1045
Fermented soymilk
Storage stability of fermented soymilks, 808
Fetus
Foodborne infections during pregnancy, 818
Field test
Method for rapid detection of ochratoxin A in wheat, 65
Finishing swine
Foodborne pathogens in finishing swine, 22
Fish
Survival of *A. simplex* in microwaved fish, 403
Fish spoilage
Biogenic amines in aerobically stored gilt-head sea bream, 398
Flavonoids
Antimicrobial and antioxidant compounds in orange essential oil, 929
Flow cytometry
Rapid detection of *Salmonella* in chicken washes, 717
Fluid milk
Dynamic growth model for *Li steria monocytogenes,* 170
Fluorodensitometry
Fluorodensitometric analysis of ergosterol, 686
Fluorogenic
L. monocytogenes detection system, 244
Fluorophos
Comparison of ALP determination methods, 81
Food(s)
Detection of *L. monocytogenes* by quantitative PCR, 35
Impedance in food hygene, 1488
PCR for *Salmonella* Typhimurium, 1103
Salmonella PCR-ELISA test, 1387
Food adulteration
Detection of CNS in meat products, 268
Foodborne
Performance of the TaqMan *Salmonella* PCR assay, 329
Foodborne disease
Foodborne and waterborne enteric protozoa, 1059
Foodborne pathogens
Biological control of *E. coli* in apples, 1372
Foodborne pathogens in finishing swine, 22
Quality and safety of Johannesburg street foods, 1278
Foodborne viruses
Detection of foodborne viruses using multiplex PCR, 1210
Food code
Salmonella Thompson in Sioux Falls, 118

Food contact surface
Swab-based detection system, 386
Food contamination
Biological control of *E. coli* in apples, 1372
Food handling
Domestic food handling video study, 1285
Food industry
HACCP in UK food industry, 786
Food irradiation
Growth rates of bacteria in irradiated meats, 1297
Food legislation
Salmonella Thompson in Sioux Falls, 118
Food safety
Australian food safety telephone survey, 921
E. coli O157:H7 stored in orange juice, 1038
Heat resistance of *B. cereus* in milk products, 410
Inactivating *E. coli* in orange juice, 277
Ozone and food safety, 1071
Pathogen reduction by acidified sodium chlorite, 580
Polychlorinated biphenyls in total diet samples, 1054
Safety of tofu, 1050
Salmonella Thompson in Sioux Falls, 118
Steam vacuuming for beef decontamination, 146
The irradiation parameter D_{10} under various conditions, 1024
Food spoilage bacteria
Responses of food spoilage bacteria to sanitizer treatments, 368
Freeze inactivation
Processing strategies to inactivate *V. vulnificus*, 592
Fresh-cut vegetables
Fresh-cut produce under equilibrium-modified atmosphere, 1128
Fresh produce
Bacterial contamination of vegetables, 644
Freshwater fish
Bacterial microflora of trout and pike, 1270
Fructooligosaccharide
Inhibition of *Salmonella* colonization, 229
Fumonisin B_1
Effects of cycling temperature on FB_1 production, 1456
Fumonisins in tortillas and nixtamalized corn from Guatemala, 1218
Fumonisins
Fumonisin production by *Fusarium* spp. from Spain, 811
Influence of spore level on fumonisin production, 814
Fungal contamination
Fluorodensitometric analysis of ergosterol, 686
Fung's double-tube
Enumeration of *C. perfringens*, 1041
Fungicides
Antimicrobial and antioxidant compounds in orange essential oil, 929
Fusarium avenaceum
Fumonisin production by *Fusarium* spp. from Spain, 811
Fusarium graminearum
Temperature effects on DON and ZEN production, 1451
Fusarium moniliforme
Effects of cycling temperature on FB_1 production, 1456
Influence of spore level on fumonisin production, 814
Fusarium oxysporum
Fumonisin production by *Fusarium* spp. from Spain, 811
Fusarium proliferatum
Effects of cycling temperature on FB_1 production, 1456
Fusarium section *Liseola*
Fumonisin production by *Fusarium* spp. from Spain, 811
Fusarium semitectum
Fumonisin production by *Fusarium* spp. from Spain, 811

β-galactosidase
Enzymatic detection of tetracyclines in milk, 632
Gamma
Irradiation of *E. coli* O157:H7 by gamma versus electrons, 10
Gamma irradiation
Endowment of cured color in meat by ionizing radiation, 1162
Sanitation of ground beef products by ionizing radiation, 619
Gamma radiation
Irradiation and MAP control of *L. monocytogenes*, 1136
Garlic
Bacteriocin-producing bacteria from garlic and ginger root, 899
Gaseous acetic acid
Disinfection of mung bean seed, 953
GC-MS
GC-MS analysis of underivatized patulin, 202
Giardia
Foodborne and waterborne enteric protozoa, 1059
Ginger
Bacteriocin-producing bacteria from garlic and ginger root, 899
Glucose oxidase
Suppression of foodborne pathogens by *P. nalgiovense*, 940
γ-glutamyl transpeptidase
Thermal inactivation of pathogens in milk, 861
Glycine betaine
Shelf life of shredded iceberg lettuce, 363
Gompertz equation
Predictive model for *L. monocytogenes* inactivation, 1143
Greece
A. hydrophila, A. caviae, and *A. sobria* in milk products in Greece, 463
Green staining alteration
Oxidized chlorophylls and copper complexes in table olives, 1172
Pigment composition in green-stained olives, 1167
Ground beef
Antibacterial effect of lactorerricin B, 747
E. coli and retail ground beef, 133
Survival of *E. coli* O157:H7 and ground beef, 1243
Ground beef patties
Cooking adequacy of beef patties, 156
Growth
Growth and survival of *E. coli*, 1466

Growth models for *Salmonella* Typhimurium, 1111
Predictive models for growth kinetics of *Salmonella*, 1470
Recovery and survival of *E. coli* O157:H7 in reconditioned water, 731
Salmonella Enteritidis in egg white powder, 585
Growth kinetics
Predictive models for growth kinetics of *Salmonella*, 106
Growth model
L. monocytogenes in cheese, 601
Growth protocol
Listeria cell growth and adhesion, 994
Growth temperature
Effect of temperature shift on *B. cereus*, 57
Gutkha
Tobacco mixes irradiation, 678

HACCP
HACCP in UK food industry, 786
Use of HACCP in apple cider production, 778
Haloterant
Halotolerant histamine-forming bacteria in salted anchovies, 509
Hamburger
E. coli and retail ground beef, 133
E. coli O157:H7 in Brazilian hamburgers, 1333
Hazard analysis and critical control point plan
Microbiology of swine dehairing, 1478
Hazard analysis critical control point
Steam vacuuming for beef decontamination, 146
Head meats
Microbiology of tails and head meats, 674
Heating
Inactiviation of *Salmonella* and *Listeria*, 980
Heat processing
Effects of commercial heat-shot process, 1266
Heat resistance
Heat resistance of *B. cereus* in milk products, 410
Nisin sensitizes spores to heat, 492
Thermal inactivation model for *Listeria monocytogenes*, 986
Hemolytic activity
Hemolytic and elastolytic activities in *Plesiomonas shigelloides*, 1475
Hepatitis A virus
Detection of foodborne viruses using multiplex PCR, 1210
Heterologous gene expression
Suppression of foodborne pathogens by *P. nalgiovense*, 940
Hide
Cleanliness of cattle at slaughter, 520
High hydrostatic pressure
High-pressure inactivation of *E. coli* in milk, 1248
High pressure
E. coli O157:H7 stored in orange juice, 1038
Inactivating *E. coli* in orange juice, 277
Pressurized, prepackaged sliced cooked ham, 1411
High-pressure treatment
High-pressure destruction of *L. monocytogenes* on pork, 40
High-voltage pulse generator
Pulsed electric field processing of foods, 1088
Histamine
Amine production by bacteria from albacore, 933
Biogenic amines in bluefish, 1033
Halotolerant histamine-forming bacteria in salted anchovies, 509
Histidine
Halotolerant histamine-forming bacteria in salted anchovies, 509
Horse
Trichinella assay for pork and horse meat, 1308
HPLC
Amine production by bacteria from albacore, 933
GC-MS analysis of underivatized patulin, 202
Human
Risk associated with avian *E. coli*, 741
Human enteroviruses
Detection of foodborne viruses using multiplex PCR, 1210
Human infections
T. saginata infections in beef, 1314
Human pathogen/plant pathogen interaction
L. monocytogenesis/soft rot bacteria interaction, 343
Hydrogen peroxide
Effect of peroxyacetic acid (Oxonia Active) on spore formers, 262
Hydrolyzed fumonisin B_1 (AP_1)
Fumonisins in tortillas and nixtamalized corn from Guatemala, 1218
Hydrophobicity
Listeria cell growth and adhesion, 994
Hydrostatic pressure
Treatment of pork sausage by high hydrostatic pressure, 480
Hygiene
Australian food safety telephone survey, 921
Domestic food handling video study, 1285
Microbiological contamination of reindeer carcass, 152
Hypochlorite
Disinfectants against *Y. enterocolitica* on lettuce, 665

Ice
Quality of packaged ice in Florida, 526
Iceberg lettuce
Shelf life of shredded iceberg lettuce, 363
Identification
Characterization of *Aeromonas* spp. from channel catfish, 30
IFN-γ
Lactic acid bacteria cytokines, 162
IgG
Swab-based detection system, 386
IL-6
Cytokine and no induction in macrophages, 1435
Lactic acid bacteria cytokines, 162

Immersion
Sanitizing fruit for juice safety, 756
Immune system
Lactic acid bacteria and immunity, 287
Lactic acid bacteria cytokines, 162
Immunity
Cytokine and no induction in macrophages, 1435
Immunoassay
Method for rapid detection of ochratoxin A in wheat, 65
Immunomagnetic separation
IMS and plating media for *Salmonella,* 198
Rapid detection of *Salmonella* in chicken washes, 717
Impedance
Impedance in food hygene, 1488
Imported lettuce
Microbiological quality of lettuce, 325
Inactivation
Inactivation of *Salmonella* and *Listeria,* 980
The irradiation parameter D_{10} under various conditions, 1024
Inactivation ratio
Pulsed electric field processing of foods, 1088
Incidence
Salmonella in beef, 467
Indicator microorganisms
Recovery of *E. coli* and enterococci from beef carcasses, 944
Indicator survival
Bacterial survival in water, 194
Infiltration
E. coli O157:H7 on apples, 444
Inhibition
Suppression of foodborne pathogens by *P. nalgiovense,* 940
Inoculation
Sanitizing fruit for juice safety, 756
Inoculum size
Influence of spore level on fumonisin production, 814
Interleukin
Cytokine expression in yogurt-fed mice, 181
Intestinal adhesion
Adhesion of lactobacilli to intestine of mice, 1430
Intramammary infection
Phenolic combination as a postmilking teat disinfectant, 1354
Iodophor
Responses of food spoilage bacteria to sanitizer treatments, 368
Iron
Iron and selenium effects on *L. monocytogenes,* 1206
Irradiated corn kernels
Influence of spore level on fumonisin production, 814
Irradiation
Irradiation of *E. coli* O157:H7 by gamma versus electrons, 10
Preservation techniques for thiamin in chicken, 1303
The irradiation parameter D_{10} under various conditions, 1024
Tobacco mixes irradiation, 678
Isolation
Comparison of *Acrobacter* isolation protocols, 610
L. monocytogenes detection system, 244
Isolation procedures
Increased sensitivity of *Listeria* detection, 532
Isolation protocol
Isolation medium for *Arcobacter,* 456

Kluyveromyces
Differential medium for *Kluyveromyces,* 189

β-lactam antibiotics
Evaluation of Delvo-X-Press, 1183
Lactic acid
Antagonistic effect of *E. faecium* J96 against *Salmonella* spp., 751
Lactic acids and nisin effects on beef shelf life, 913
Listeria cell growth and adhesion, 994
Lactic acid bacteria
Bologna sausage preservation using nisin, 1004
Cytokine and no induction in macrophages, 1435
Lactic acid bacteria and immunity, 287
Lactic acid bacteria cytokines, 162
Storage stability of fermented soymilks, 808
Lacticin 3147
Acid-adapted *Listeria* tolerant to bacteriocins, 536
Lacticin 3147-enriched whey powder, 1011
Lactobacilli
Adhesion of lactobacilli to intestine of mice, 1430
Bile resistance and bile precipitation, 905
Cytokine expression in yogurt-fed mice, 181
Intestinal lactobacilli from chickens as potential probiotics, 252
Lactobacillus acidophilus
Enumerating *L. acidophilus* and *Bifidobacterium* spp., 77
Lactobacillus lactis
Antagonistic action of *L. lactis* toward foodborne pathogens, 1336
Lactobacillus reuteri
Reuterin as a meat decontaminant, 257
Lactoferricin B
Antibacterial effect of lactorerricin B, 747
Lactoperoxidase
L. monocytogenes survival in acidified skim milk, 670
Lectinlike substance
Adhesion of lactobacilli to intestine of mice, 1430
Lettuce
Disinfectants against *Y. enterocolitica* on lettuce, 665
E. coli O157:H7 on lettuce, 845
E. coli on lettuce, 3
Liquid egg products
Elimination of *Salmonella* Enteritidis from liquid egg products, 112
Liquid whole egg
Nisin reduces thermal resistance of *L. monocytogenes,* 999
Listeria
Impedance in food hygene, 1488
Inactivation of *Salmonella* and *Listeria,* 980

Treatment of pork sausage by high hydrostatic pressure, 480
Listeria innocua
Thermal inactivation of pathogens in milk, 861
Listeria monocytogenes
Detection of *L. monocytogenes* by quantitative PCR, 35
Dynamic growth model for *Li steria monocytogenes,* 170
Effect of nisin and moderate heat on *Listeria,* 46
Fresh-cut produce under equilibrium-modified atmosphere, 1128
Growth control of *L. monocytogenes,* 336
High-pressure destruction of *L. monocytogenes* on pork, 40
Inactivation of biofilms, 761
Inactivation of foodborne pathogens on cutting boards, 857
Increased sensitivity of *Listeria* detection, 532
Iron and selenium effects on *L. monocytogenes,* 1206
Irradiation and MAP control of *L. monocytogenes,* 1136
Lacticin 3147-enriched whey powder, 1011
Listeria cell growth and adhesion, 994
L. monocytogenes detection system, 244
L. monocytogenes growth controlled by bacteriocin on salmon, 1394
L. monocytogenes in cheese, 601
L. monocytogenes survival in acidified skim milk, 670
Nisin or nisin and EDTA inhibition of *L. monocytogenes* and *E. coli* O157:H7, 1123
Nisin reduces thermal resistance of *L. monocytogenes,* 999
Predictive model for *L. monocytogenes* inactivation, 1143
Reuterin as a meat decontaminant, 257
Salmonella, C. jejuni, C. coli, and *L. monocytogenes* in poultry, 735
Thermal inactivation model for *Listeria monocytogenes,* 986
Thermal inactivation of pathogens in milk, 861
Thin agar layer method, 1346
Listeriolysin O
Iron and selenium effects on *L. monocytogenes,* 1206
Listeriosis
Foodborne infections during pregnancy, 818
Lobster meat
Effect of nisin and moderate heat on *Listeria,* 46
Low microbial load foods
Comparison of media for recovery of *Salmonella* spp. from foods, 16
Lysozyme
High-pressure inactivation of *E. coli* in milk, 1248

Maize
Aflatoxin reduction in corn, 650
Microbiota of Portuguese sourdough, 1416
Man Rogosa Sharpe broth
Inactivation of bacteriophages, 894
Manual shaver
Microbiology of swine dehairing, 1478
MAP
Botulism risk from packaged cut melons, 948
C. botulinum in MAP crumpets, 349
Effect of pH and CO_2 on *C. botulinum,* 1157
Irradiation and MAP control of *L. monocytogenes,* 1136
Mascarpone cheese
C. botulinum in milk products, 867
Meat
High-pressure destruction of *L. monocytogenes* on pork, 40
IMS and plating media for *Salmonella,* 198
Microbiological status of sheep meat in Australia, 380
Meat chemistry
Centralized meat packaging, 418
Meat decontamination
Reuterin as a meat decontaminant, 257
Meat distribution
Centralized meat packaging, 418
Meat microbiology
Centralized meat packaging, 418
Meat preservation
Reuterin as a meat decontaminant, 257
Melons
Botulism risk from packaged cut melons, 948
Membrane fatty acid
Acid-adapted *Listeria* tolerant to bacteriocins, 536
Mesophilic genera
Bacterial microflora of trout and pike, 1270
Metals
Quality of packaged ice in Florida, 526
Methods
Limitations of molecular biological techniques for foods, 691
Microbial metabolites
Biogenic amines in aerobically stored gilt-head sea bream, 398
Microbiological
Beef carcass contamination, 140
Microbiological status of sheep meat in Australia, 380
Quality of packaged ice in Florida, 526
Microbiological changes
Pressurized, prepackaged sliced cooked ham, 1411
Microbiological quality
Tobacco mixes irradiation, 678
Microbiological sampling
Broiler skin sampling, 284
Microbiology
Growth rates of bacteria in irradiated meats, 1297
Microflora
Microbiota of Portuguese sourdough, 1416
Microwave
Survival of *A. simplex* in microwaved fish, 403
Milk
Antibiotic residues and bacteria in milk, 177
Clostridium botulinum in CO_2-treated milk, 872
Enzymatic detection of tetracyclines in milk, 632
High-pressure inactivation of *E. coli* in milk, 1248
Quality and safety of milk, 625
Resistance of bacteria on bovine products, 615

rpoS expression by *Salmonella* in milk, 70
rRNA persistence in contaminated milk, 839
Stability of tetracyclines in milk, 547
Thermal resistance of spores supplemented with nisin, 484
Milk products
A. hydrophila, A. caviae, and *A. sobria* in milk products in Greece, 463
Heat resistance of *B. cereus* in milk products, 410
Milk residues
Evaluation of Delvo-X-Press, 1183
Minitube
Enumeration of *C. perfringens,* 1041
Mitsubishi AnaeroPack System
Enumeration of *C. perfringens,* 1041
Mixed feeds
Coproduction of cyclopiazonic acid and aflatoxins, 292
Model
Growth models for *Salmonella* Typhimurium, 1111
Modeling
Growth rates of bacteria in irradiated meats, 1297
Model validation
Dynamic growth model for Li steria monocytogenes, 170
Predictive models for growth kinetics of *Salmonella,* 106
Modified atmosphere
Botulism risk from packaged cut melons, 948
Modified atmosphere packaging
Centralized meat packaging, 418
Modified ecometric method
Bile resistance and bile precipitation, 905
Molds
The combined effect of nisin and propionic acid on mold growth, 1223
Monte Carlo simulation
Thermal inactivation of pathogens in milk, 861
Morganella morganii
Biogenic amines in bluefish, 1033
MS-GLC
Polychlorinated biphenyls in total diet samples, *1054*
Multiplex PCR
Detection of foodborne viruses using multiplex PCR, 1210
Mung bean
Disinfection of mung bean seed, 953
Mussels
Canning process for contaminated mussels, 515
Mycelium
Optimization of antioxidants from A. candidus, 657
Mycotoxin(s)
Anifungal proteins in maize kernel tissues, *295*
FB_1 production suppressed by *T. viride,* 1326

NaCl
Effect of temperature shift on *B. cereus,* 57
Nervous tissue
Brain or spinal cord in meat, 394
Nisin
Acid-adapted *Listeria* tolerant to bacteriocins, 536
Bologna sausage preservation using nisin, *1004*
Effect of nisin and moderate heat on *Listeria,* 46
High-pressure inactivation of *E. coli* in milk, 1248
Lactic acids and nisin effects on beef shelf life, 913
Nisin or nisin and EDTA inhibition of *L. monocytogenes* and *E. coli O157:H7, 1123*
Nisin reduces thermal resistance of *L. monocytogenes,* 999
Nisin sensitizes spores to heat, 492
The combined effect of nisin and propionic acid on mold growth, 1223
Thermal resistance of spores supplemented with nisin, 484
Nitric oxide
Cytokine and no induction in macrophages, 1435
Lactic acid bacteria cytokines, 162
Nitrite
Endowment of cured color in meat by ionizing radiation, 1162
Nitrogen source
Optimization of antioxidants from *A. candidus,* 657
Nonfat skim milk
Inactivation of bacteriophages, 894
Nonisothermic heating
Nonisothermic heating of *Bacillus stearothermophilus,* 958
Nonlinear regression
Predictive model for *L. monocytogenes* inactivation, *1143*
Nonthermal processing
Inactivation of *E. coli* O157:H7 by pulsed electric fields, 793
Pulsed electric field processing of foods, 1088
Norwalk virus
Detection of foodborne viruses using multiplex PCR, *1210*
Norway
Ecological effect of *T. saginata* in beef imported into Norway, 1320
T. saginata infections in beef, 1314
NSE
Detection of CNS in meat products, 268
5′ Nuclease assay
Performance of the TaqMan *Salmonella* PCR assay, 329

Occurrence
Verocytotoxin-producing *E. coli* O157 in meats, 1115
Ochratoxin A
Cholestyramine and ochratoxin A toxicity, 1461
Method for rapid detection of ochratoxin A in wheat, 65
Octanoic acid
Inactivation of biofilms, 761
Oligonucleotide-ligation assay (OLA)
Differentiation of *Cyclospora* and *Eimeria* spp. by OLA, 682
Olive
Oxidized chlorophylls and copper complexes in table olives, 1172
Pigment composition in green-stained olives, 1167

Orange essential oil
Antimicrobial and antioxidant compounds in orange essential oil, 929
Orange juice
Alicyclobacillus in orange juice, 883
E. coli O157:H7 stored in orange juice, 1038
Inactivating *E. coli* in orange juice, 277
Organic acid
Growth and survival of *E. coli*, 1466
Organic acids
Acid-adapted *E. coli* O157:H7, 451
Decontamination of beef with saponin, 280
Disinfectants against *Y. enterocolitica* on lettuce, 665
Organic acids salts
Preservation of whole and peeled shrimp, 51
Oxidized chlorophyll derivatives
Oxidized chlorophylls and copper complexes in table olives, 1172
Oysters
Effects of commercial heat-shot process, 1266
Processing strategies to inactivate *V. vulnificus*, 592
Ozone
Ozone and food safety, 1071

Package
Shelf life of shredded iceberg lettuce, 363
Packaging
Irradiation of *E. coli* O157:H7 by gamma versus electrons, 10
Preservation techniques for thiamin in chicken, 1303
Packaging film
Microbiology of packaged produce, 499
Paralytic shellfish poison
Canning process for contaminated mussels, 515
Pasteurization
Comparison of ALP determination methods, 81
Salmonella Enteritidis inactivation in egg white by pulsed electric fields, 1381
Use of HACCP in apple cider production, 778
Y. enterocolitica in milk, 1203
Pathogen(s)
Effect of peroxyacetic acid (Oxonia Active) on spore formers, 262
Recovery of *E. coli* and enterococci from beef carcasses, 944
The irradiation parameter D_{10} under various conditions, 1024
Pathogen growth
L. monocytogenesis/soft rot bacteria interaction, 343
Pathogen survival
Bacterial survival in water, 194
Patulin
GC-MS analysis of underivatized patulin, 202
PCR-ELISA
Salmonella PCR-ELISA test, 1387
PCR primers
PCR for *Salmonella* Typhimurium, 1103
Pediococcus acidilactici
Antimicrobial activity of diacetyl, 975
Penicillium
Vanillin, potassium sorbate, and mold growth, 540
Penicillium nalgiovense
Suppression of foodborne pathogens by *P. nalgiovense*, 940
Penicillium spp.
Cyclopiazonic acid in Taleggio cheese, 1198
Peracetic acid
Inactivation of biofilms, 761
Peracetic acid/hydrogen peroxide
Responses of food spoilage bacteria to sanitizer treatments, 368
Peroxyacetic acid
Effect of peroxyacetic acid (Oxonia Active) on spore formers, 262
pH
Effect of pH and CO_2 on *C. botulinum*, 1157
Modeling growth and decline of *S. aureus*, 356
Phage
Inactivation of bacteriophages, 894
Phenolic combination
Phenolic combination as a postmilking teat disinfectant, 1354
Physical
Quality of packaged ice in Florida, 526
Pigment
Oxidized chlorophylls and copper complexes in table olives, 1172
Pigment composition in green-stained olives, 1167
Pig tongue
*yad*A-positive *Y. enterocolitica* at the retail level, 123
Plastic
Triclosan-incorporated plastic on beef, 474
Plate heat exchanger
Elimination of *Salmonella* Enteritidis from liquid egg products, 112
Platichthys flesus
Indirect ELISA for flatfish species identification, 1178
Plesiomonas
Bacterial microflora of trout and pike, 1270
Plesiomonas shigelloides
Hemolytic and elastolytic activities in *Plesiomonas shigelloides*, 1475
Pleuronectes platessa
Indirect ELISA for flatfish species identification, 1178
Polisher
Microbiology of swine dehairing, 1478
Polychlorinated biphenyls (PCB)
Polychlorinated biphenyls in total diet samples, 1054
Polylactic acid
Lactic acids and nisin effects on beef shelf life, 913
Polymerase chain reaction (PCR)
Detection of *L. monocytogenes* by quantitative PCR, 35
Differentiation of *Cyclospora* and *Eimeria* spp. by OLA, 682
Limitations of molecular biological techniques for foods, 691
PCR assay for *Alternaria*, 1191
PCR-based detection of *S. aureus*, 1150

Performance of the TaqMan *Salmonella* PCR assay, 329
*yad*A-positive *Y. enterocolitica* at the retail level, 123
Pork
High-pressure destruction of L. monocytogenes on pork, 40
Treatment of pork sausage by high hydrostatic pressure, 480
Trichinella assay for pork and horse meat, 1308
*yad*A-Positive *Y. enterocolitica* at the retail level, 123
Pork loin ham
Endowment of cured color in meat by ionizing radiation, 1162
Post milking teat disinfectant
Phenolic combination as a postmilking teat disinfectant, 1354
Postharvest
FB_1 production suppressed by *T. viride*, 1326
Potassium sorbate
Modeling growth and decline of *S. aureus*, 356
Vanillin, potassium sorbate, and mold growth, 540
Poultry
Antagonistic effect of *E. faecium* J96 against *Salmonella* spp., 751
Comparison of *Acrobacter* isolation protocols, 610
Inactivation of *Salmonella* and *Listeria*, 980
Salmonella, C. jejuni, C. coli, and *L. monocytogenes* in poultry, 735
Precondition
Growth models for *Salmonella* Typhimurium, 1111
Predictive models for growth kinetics of *Salmonella*, 1470
Predictive microbiology
Modeling growth and decline of *S. aureus*, 356
Predictive model
Predictive models for growth kinetics of *Salmonella*, 106, 1470
Thermal inactivation model for *Listeria monocytogenes*, 986
Preservatives
Inhibition of fungi by Welsh onion, 414
Prevalence
Characterization of *Aeromonas* spp. from channel catfish, 30
Foodborne pathogens in finishing swine, 22
Previous growth pH
Predictive models for growth kinetics of *Salmonella*, 106
Probiotic
Adhesion of lactobacilli to intestine of mice, 1430
Antagonistic effect of *E. faecium* J96 against *Salmonella* spp., 751
Probiotic feed
Intestinal lactobacilli from chickens as potential probiotics, 252
Processing
Quality and safety of milk, 625
Processing hygiene
Microbiology of tails and head meats, 674
Progesterone
Foodborne infections during pregnancy, 818
Propionic acid
The combined effect of nisin and propionic acid on mold growth, 1223
Protein
Salmonella Enteritidis inactivation in egg white by pulsed electric fields, 1381
Proteinases
Proteinases from ewe's milk *Pseudomonas*, 543
Pseudomonas
Amine production by bacteria from albacore, 933
Inactivation of biofilms, 761
Pseudomonas fluorescens
Proteinases from ewe's milk *Pseudomonas*, 543
Psychotrophic
Psychotrophic clostridia in meat, 766
Pulsed electric field
Inactivation of *E. coli* O157:H7 by pulsed electric fields, 793
Pulsed electric field processing of foods, 1088
Salmonella Enteritidis inactivation in egg white by pulsed electric fields, 1381
Purification
Proteinases from ewe's milk *Pseudomonas*, 543
Putrescine
Biogenic amines in bluefish, 1033

Quality
Quality and safety of Johannesburg street foods, 1278
Quality and safety of milk, 625
Quality assurance
Trichinella assay for pork and horse meat, 1308
Quantitation
Detection of *L. monocytogenes* by quantitative PCR, 35

Radish extract
Inhibition of *Escherichia coli* O157:H7 in fresh radish sprouts, 128
Radish seeds
Inhibition of *Escherichia coli* O157:H7 in fresh radish sprouts, 128
Radish sprout
Inhibition of *Escherichia coli* O157:H7 in fresh radish sprouts, 128
Rapid automated detection
Rapid detection of salmonellae, 1341
Rapid detection
Rapid detection of *E. coli* O157:H7 by a biosensor, 711
Rapid detection of *Salmonella* in chicken washes, 717
Rapid method
Enumeration of *E. coli* from animal-derived foods using conductance, 1260
Rappaport-Vassiliadis medium
Comparison of media for recovery of *Salmonella* spp. from foods, 16
Reconditioned wastewater
Recovery and survival of *E. coli* O157:H7 in reconditioned water, 731

Recovery of *Salmonella* and *V. cholerae* from reconditioned water, 724
Reconditioned water
Bacterial survival in water, 194
Recovery
Carcass sampling by sponging and excising, 1255
Recovery and survival of *E. coli* O157:H7 in reconditioned water, 731
Recovery of *Salmonella* and *V. cholerae* from reconditioned water, 724
Reindeer
Microbiological contamination of reindeer carcass, 152
Reinhardtius hippoglossoides
Indirect ELISA for flatfish species identification, 1178
Reliability
Cleanliness of cattle at slaughter, 520
Resazurin
Simplate for total plate count-color indicator, 1404
Residues
Antibiotic residues and bacteria in milk, 177
Restaurant safety
Salmonella Thompson in Sioux Falls, 118
Retail meats
Verocytotoxin-producing *E. coli* O157 in meats, 1115
Reuterin
Reuterin as a meat decontaminant, 257
Ribosomal RNA gene
PCR assay for *Alternaria,* 1191
Ribosome-inactivating-protein (RIP)
Anifungal proteins in maize kernel tissues, 295
Risk
HACCP in UK food industry, 786
Risk associated with avian *E. coli,* 741
Risk assessment
T. saginata infections in beef, 1314
Risk factors
Fecal shedding of *E. coli* O157 on dairy farms, 307
rpoS
E. coli acid resistance, 211
RpoS
rpoS expression by *Salmonella* in milk, 70
rRNA, 16S
rRNA persistence in contaminated milk, 839
rRNA, 23S
PCR-based detection of *S. aureus,* 1150
Rumen
E. coli O157:H7 in fasted calves, 574
Rye
Microbiota of Portuguese sourdough, 1416

Saccharomyces cerevisiae
Inactivation of *S. cerevisiae* by thermal ultrasonication, 1215
Safety
C. botulinum in MAP crumpets, 349
Effect of pH and CO_2 on *C. botulinum,* 1157
L. monocytogenes growth controlled by bacteriocin on salmon, 1394
Quality and safety of Johannesburg street foods, 1278
Salmonella
Antagonistic effect of *E. faecium* J96 against *Salmonella* spp., 751
Comparison of media for recovery of *Salmonella* spp. from foods, 16
Foodborne pathogens in finishing swine, 22
Growth models for *Salmonella* Typhimurium, 1111
Impedance in food hygene, 1488
IMS and plating media for *Salmonella,* 198
Inactivation of *Salmonella* and *Listeria,* 980
Inhibition of *Salmonella* colonization, 229
Microbiological quality of lettuce, 325
Mucosal competitive exclusion to reduce *Salmonella* in swine, 1376
Performance of the TaqMan *Salmonella* PCR assay, 329
Predictive models for growth kinetics of *Salmonella,* 1470
Rapid detection of *Salmonella* in chicken washes, 717
Recovery of *Salmonella* and *V. cholerae* from reconditioned water, 724
Salmonella, C. jejuni, C. coli, and *L. monocytogenes* in poultry, 735
Salmonella in alfalfa seeds, 662
Salmonella in beef, 467
Salmonella in cheesecake, 26
Salmonella PCR-ELISA test, 1387
Salmonella penetration of eggshell membrane, 73
Salmonella Thompson in Sioux Falls, 118
Triclosan-incorporated plastic on beef, 474
Salmonellae
Rapid detection of salmonellae, 1341
Salmonella Enteritidis
Antagonistic action of *L. lactis* toward foodborne pathogens, 1336
Elimination of *Salmonella* Enteritidis from liquid egg products, 112
Fate of pathogens on currency, 805
Salmonella Enteritidis in egg white powder, 585
Salmonella Enteritidis inactivation in egg white by pulsed electric fields, 1381
Salmonella Typhimurium
Antagonistic action of *L. lactis* toward foodborne pathogens, 1336
Antimicrobial activity of diacetyl, 975
Decontamination of beef with saponin, 280
Pathogen reduction by acidified sodium chlorite, 580
PCR for *Salmonella* Typhimurium, 1103
Predictive models for growth kinetics of *Salmonella,* 106
Rapid response biosensor to detect *Salmonella* Typhimurium, 431
rpoS expression by *Salmonella* in milk, 70
Sample location
Broiler skin sampling, 284
Sample size
Broiler skin sampling, 284
Sampling
Carcass sampling by sponging and excising, 1255
Sandwiched microtiter plate
Enumeration of *C. perfringens,* 1041

Sanitation
Swab-based detection system, 386
Use of HACCP in apple cider production, 778
Sanitizer(s)
Quality and safety of milk, 625
Responses of food spoilage bacteria to sanitizer treatments, 368
Sanitizing fruit for juice safety, 756
Saponin
Decontamination of beef with saponin, 280
Sausages
Bologna sausage preservation using nisin, 1004
Scharer test
Comparison of ALP determination methods, 81
Selective enrichment media
Comparison of media for recovery of *Salmonella* spp. from foods, 16
Selenium
Iron and selenium effects on *L. monocytogenes,* 1206
Sensory
Treatment of pork sausage by high hydrostatic pressure, 480
Sheep
Microbiological status of sheep meat in Australia, 380
Sheep carcass
Inadequately cleaned equipment, 637
Shelf life
Endowment of cured color in meat by ionizing radiation, 1162
Growth rates of bacteria in irradiated meats, 1297
Preservation of whole and peeled shrimp, 51
Quality and safety of milk, 625
Sanitation of ground beef products by ionizing radiation, 619
Shelf life of shredded iceberg lettuce, 363
Storage stability of fermented soymilks, 808
Treatment of pork sausage by high hydrostatic pressure, 480
Shellfish
Processing strategies to inactivate *V. vulnificus,* 592
Shigella
Microbiological quality of lettuce, 325
Shrimp
Preservation of whole and peeled shrimp, 51
Shrimp chitosan
Antibacterial activity of chitosan, 239
SimPlate
Simplate for total plate count-color indicator, 1404
Singeer
Microbiology of swine dehairing, 1478
Skim milk
L. monocytogenes survival in acidified skim milk, 670
Y. enterocolitica in milk, 1203
Skin sampling
Broiler skin sampling, 284
Slaughterhouse
Microbiological contamination of reindeer carcass, 152
Sliced cooked ham
Pressurized, prepackaged sliced cooked ham, 1411
Sodium chloride
Predictive models for growth kinetics of *Salmonella,* 1470
Solea solea
Indirect ELISA for flatfish species identification, 1178
Sorption
Cholestyramine and ochratoxin A toxicity, 1461
Soy product
Safety of tofu, 1050
Species identification
Indirect ELISA for flatfish species identification, 1178
Spoilage
Bologna sausage preservation using nisin, 1004
Psychotrophic clostridia in meat, 766
Spoilage indicators
Biogenic amines in aerobically stored gilt-head sea bream, 398
Spore formers
Effect of peroxyacetic acid (Oxonia Active) on spore formers, 262
Spores
The irradiation parameter D_{10} under various conditions, 1024
Thermal resistance of spores supplemented with nisin, 484
Spray drying
Spray-drying of bacteriocin-producing lactic acid bacteria, 773
Sprouted vegetables
Disinfection of mung bean seed, 953
Sprouting
Salmonella in alfalfa seeds, 662
Stability
Stability of tetracyclines in milk, 547
Zearalenone stability in extruded corn grits, 1482
Stabilizing additives
Heat resistance of *B. cereus* in milk products, 410
Standard plate count
Simplate for total plate count-color indicator, 1404
Staphylococcal enterotoxin
Emesis in *S. murinus* induced by staphylococcal enterotoxin A, 1350
Staphylococcus aureus
Lacticin 3147-enriched whey powder, 1011
Modeling growth and decline of *S. aureus,* 356
PCR-based detection of *S. aureus,* 1150
Starter culture
PCR-based detection of *S. aureus,* 1150
Starvation stress
Recovery and survival of *E. coli* O157:H7 in reconditioned water, 731
Recovery of *Salmonella* and *V. cholerae* from reconditioned water, 724
Stationary phase sigma factor
rpoS expression by *Salmonella* in milk, 70
Steam vacuuming
Steam vacuuming for beef decontamination, 146
Stenotrophomonas
Amine production by bacteria from albacore, 933

Sterilant
Effect of peroxyacetic acid (Oxonia Active) on spore formers, 262
Stool
PCR for *Salmonella* Typhimurium, 1103
Storage
Amine production by bacteria from albacore, 933
Street-vended food
Quality and safety of Johannesburg street foods, 1278
Streptococcus uberis
Phenolic combination as a postmilking teat disinfectant, 1354
Strict temperature control
Centralized meat packaging, 418
Stunning
Cattle stunning CNS tissue, 390
Suncus murinus
Emesis in *S. murinus* induced by staphylococcal enterotoxin A, 1350
Superoxide dismutase
Iron and selenium effects on *L. monocytogenes,* 1206
Surfactants
Disinfectants against *Y. enterocolitica* on lettuce, 665
Survey
Australian food safety telephone survey, 921
Microbiological status of sheep meat in Australia, 380
Survival
Growth and survival of *E. coli,* 1466
Recovery and survival of *E. coli* O157:H7 in reconditioned water, 731
Survival of *E. coli* O157:H7 and ground beef, 1243
Verocytotoxin-producing *E. coli* O157 in meats, 1115
Swine
Mucosal competitive exclusion to reduce *Salmonella* in swine, 1376
Swine dressing operation
Microbiology of swine dehairing, 1478

Taenia saginata
Ecological effect of *T. saginata* in beef imported into Norway, 1320
T. saginata infections in beef, 1314
Tag
Cleanliness of cattle at slaughter, 520
Tails
Microbiology of tails and head meats, 674
Taleggio cheese
Cyclopiazonic acid in Taleggio cheese, 1198
Taxonomic identification
Microbiota of Portuguese sourdough, 1416
Testing
Beef carcass contamination with *E. coli,* 234
Tetracyclines
Enzymatic detection of tetracyclines in milk, 632
Stability of tetracyclines in milk, 547
Thermal inactivation
Predictive model for *L. monocytogenes* inactivation, 1143
Processing strategies to inactivate *V. vulnificus,* 592
Thermal inactivation kinetics
Inactivation of *S. cerevisiae* by thermal ultrasonication, 1215
Thermal kinetics
Nonisothermic heating of *Bacillus stearothermophilus,* 958
Thermal resistance
Nisin reduces thermal resistance of *L. monocytogenes,* 999
Thermotolerance
Effect of temperature shift on *B. cereus,* 57
Thiamin
Preservation techniques for thiamin in chicken, 1303
Thin agar layer method
Thin agar layer method, 1346
Thin-layer chromatography
Fluorodensitometric analysis of ergosterol, 686
Thymus vulgaris
Antimicrobial activity of *T. vulgaris* oils, 1017
TMG broth
Inactivation of bacteriophages, 894
TNF-α
Cytokine and no induction in macrophages, 1435
Lactic acid bacteria cytokines, 162
Tobacco
Tobacco mixes irradiation, 678
Tofu
Safety of tofu, 1050
Tongues
Microbiology of tails and head meats, 674
Total diet
Polychlorinated biphenyls in total diet samples, 1054
Total viable counts
Impedance in food hygene, 1488
Toxicity
Canning process for contaminated mussels, 515
Toxins
C. botulinum in milk products, 867
Toxoplasmosis
Foodborne infections during pregnancy, 818
Training
HACCP in UK food industry, 786
Trichinella
Trichinella assay for pork and horse meat, 1308
Triclosan
Triclosan-incorporated plastic on beef, 474
Triose phosphate isomerase
Cooking adequacy of beef patties, 156
Tumor necrosis factor
Cytokine expression in yogurt-fed mice, 181
Turkey
Irradiation and MAP control of *L. monocytogenes,* 1136

Ultrasound
Inactivation of *S. cerevisiae* by thermal ultrasonication, 1215
UV treatment
Botulism risk from packaged cut melons, 948

Validation
Trichinella assay for pork and horse meat, 1308
Vanillin
Vanillin, potassium sorbate, and mold growth, 540
Vegetables
Bacterial contamination of vegetables, 644
Microbiology of packaged produce, 499
Vegetable spoilage
L. monocytogenesis/soft rot bacteria interaction, 343
Vibrio cholerae
Microbiological quality of lettuce, 325
Recovery of *Salmonella* and *V. cholerae* from reconditioned water, 724
Vibrio vulnificus
Effects of commercial heat-shot process, 1266
Processing strategies to inactivate *V. vulnificus,* 592
Video study
Domestic food handling video study, 1285
Vomitoxin
Extrusion and autoclaving of deoxynivalenol, 962

Water psychrotrophic genera
Bacterial microflora of trout and pike, 1270
Welsh onion
Inhibition of fungi by Welsh onion, 414
Wheat
Extrusion processing of DON-contaminated wheat, 1485
Method for rapid detection of ochratoxin A in wheat, 65
Whey powder
Lacticin 3147-enriched whey powder, 1011
Whole milk
Y. enterocolitica in milk, 1203

Xanthomonas
Amine production by bacteria from albacore, 933

*yad*A
*yad*A-positive *Y. enterocolitica* at the retail level, 123
Yeast and mold count
Quality of packaged ice in Florida, 526
Yersinia
Digoxigenin-labeled PCR amplicon probes, 438
Disinfectants against *Y. enterocolitica* on lettuce, 665
Yersinia enterocolitica
Foodborne pathogens in finishing swine, 22
*yad*A-positive *Y. enterocolitica* at the retail level, 123
Y. enterocolitica in milk, 1203
Yogurt
Cytokine expression in yogurt-fed mice, 181

Zeamatin
Anifungal proteins in maize kernel tissues, 295
Zea mays
Anifungal proteins in maize kernel tissues, 295
Zearalenone
Temperature effects on DON and ZEN production, 1451
Zearalenone stability in extruded corn grits, 1482
